Software Development Engineering student and Software Engineering Intern at John Deere, with hands-on experience building and supporting production enterprise applications. Passionate about technology, continuous learning, and solving complex problems through scalable software solutions. Known for being a dependable team player who enjoys collaborating with others, sharing knowledge, and building strong working relationships across teams. Combining technical expertise in Java, Spring Boot, React, JavaScript, and SQL with strong communication and problem-solving skills to deliver reliable, high-quality software. Seeking a Software Engineer opportunity to contribute to meaningful projects while continuing to grow as an engineer.

## EDUCATION

**Universidad Autónoma de Nuevo León (UANL)** Jan 2022 – Dec 2026
*Facultad de Ingeniería Mecánica y Eléctrica (FIME)*
**B.S. in Software Development Engineering**

## PROFESSIONAL EXPERIENCE

**John Deere** Jul 2025 – Present
*Full Stack Software Development Intern*

- Build and maintain full-stack features for a production enterprise application, writing backend logic in Java and Spring Boot and UI components in React and JavaScript.
- Develop and consume RESTful APIs that connect React interfaces to Spring Boot services.
- Query and update application data in relational databases using SQL.
- Debug and resolve frontend and backend issues to improve application reliability and performance.
- Collaborate through Git and GitHub: feature branching, pull requests, code reviews, and merge conflict resolution.
- Deploy changes through the team's CI/CD pipeline following established SDLC practices.
- Contribute reusable components and keep code clean and maintainable; participate in daily standups and sprint planning.

**Banorte** Jan 2024 – Jun 2025
*Bilingual Customer Service Executive*

- Resolved account issues for a bilingual, international client base in a financial services setting, working under time pressure and handling sensitive information with care.

## PROJECTS

**MedTrack: Medical Center Management System** University Project

- Developed a medical center administration system with a Java backend and a JavaScript frontend.
- Built features to manage documents and medical appointments for each client.

**Letras Inclusivas: Accessible Software Platform with OCR** University Project

- Backend developer on a five-person team building a web platform with an accessible book library (BRF and PDF downloads), PDF-to-Braille and Braille-to-text translation tools, and user accounts.
- Stack: Python, Pytesseract (OCR), OpenCV. demo

## TECH STACK

**Languages:** Java, JavaScript, TypeScript, Python
**Backend:** Spring Boot, RESTful APIs, Object-Oriented Programming (OOP), Junit 5, Mockito
**Frontend:** React, HTML5, CSS3, Jest, React Testing Library
**Databases:** SQL, Relational Databases
**Tools & DevOps:** Git, GitHub, CI/CD Pipelines, Postman
**Practices:** Agile, SDLC, Debugging, Reusable Components

## CERTIFICATIONS

- Front-End Developer (May 2025)
- Back-End Developer (Apr 2025)
- Java Essentials, LinkedIn (Jul 2026)
- TypeScript Essentials, LinkedIn (May 2026)

## LANGUAGES

Spanish (Native) | English (C1, Advanced) | French (B1, Intermediate)
